This is he formula that we use.

Cell A1 = Prize Pool

Cell A2 = Place Finished

So, Example

Price Pool is 1000 and player came 2 place total points will be 20.86.

Every Saturday and Sunday €250 in cash for players still playing at 0400am

To be valid the best hand Promo the cash game table needs to be still running at 0300am during the week and still 0400am during the Saturday and Sunday.

and the player winning the best hand needs to be still playing.

#### ***Example 1***

best hand player xx did it at 2100 table is still running at 0300Am during the week and still 0400am during the Saturday and Sunday.

and the player xx still playing Poker supervisor will give the ticket to the player and player can cash it out from cash desk.

### ***Example 2***

Player yy did the best hand at 2200 but table closes at 0230 then the best hand is not valid so player will lose the best hand because the table closed before.

### ***Example 3***

Player cc did the best hand at 0000 and he leaves the table and come back at 0300 to get the Best Hand.

This is only VALID for NLH unless the casino will decide to change it.(example Casino can change the promo which can be valid as well for PLO but casino staff has to advise all players before the promo will start.
